I. WHO WE ARE

ARICO began its journey in 1977 with the establishment of Phu Lam Factory in District 6, Ho Chi Minh City, setting the stage for industrial refrigeration in Vietnam. In 1993, the formation of Seaprodex Refrigeration Industry Corporation (Searefico) marked a defining step forward. By 2007, ARICO officially emerged, inheriting the pioneering spirit and expertise of Searefico's Industrial Refrigeration Division.

For nearly five decades, ARICO has been a leader in innovative refrigeration, driving the evolution of Vietnam's food freezing industry and shaping the refrigeration sector with its engineering excellence and skilled professionals.

Now, as a proud member of Hoshizaki Japan since March 2025, ARICO continues its mission to revolutionize food preservation and fuel industry growth with unwavering dedication.

Our primary goal is to create and enhance added value for our clients, empowering them to remain competitive in an ever-evolving world.

We specialize in offering comprehensive Design, Consultancy, Manufacturing, and Engineering services to support our clients in industrial refrigeration, food preservation, and cold storage solutions.

Our motto is “Always in favour of your development”

www.arico.com.vn

II. COMPANY BRIEF INFORMATION

BUSINESS ACTIVITIES

We provide master planning, design, construction, and maintenance services, ensuring seamless collaboration across all disciplines to deliver efficient designs and successfully execute projects.

We specialize in:

- ✓ *Developing innovative industrial refrigeration systems and freezing equipment for optimal food preservation.*
- ✓ *Delivering comprehensive refrigeration services tailored to the Food & Beverage, dairy, and pharmaceutical industries.*
- ✓ *Offering integrated engineering solutions for the cold chain, including industrial refrigeration systems, thermal insulation facilities, Warehouse Management Systems (WMS), electrical control systems, and auxiliary facilities.*
- ✓ *Manufacturing high-quality commercial Food & Beverage (F&B) equipment and industrial-grade food processing freezers.*
- ✓ *Serving as an Integrated Engineering Contractor, with expertise in industrial refrigeration for food processing, F&B operations, and cold chain logistics.*

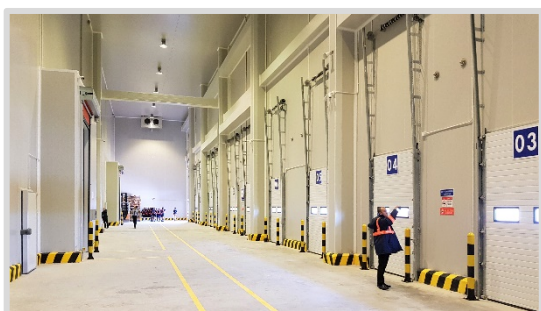

Industrial Refrigeration Solution

We are a Design & Build (D&B) contractor for Ammonia refrigeration system, Freon systems, Cold storage, M&E services, Utility system for food processing plants, factory and building, cold chain, etc.

Food Processing Equipment

We design, manufacture, install, and commission (T&C) food processing equipment customized to our clients' needs. Our products include solutions for processing, cooking, freezing, and chilling seafood, ready-to-eat meals, fruits, vegetables, poultry, and more.

Cold Storage Warehouse Solution

We deliver complete cold storage packages, from design to installation, serving sectors like clean rooms, cold rooms, insulated buildings for F&B processing, logistics, pharmaceuticals, HORECA, etc.

BRIEF HISTORY OF ARICO

Our legacy is our client's development

Arico has consistently been a leading company in Vietnam's food and seafood machinery industry. Our journey began in 1977 with the establishment of Phu Lam Mechanical Workshop, under Decision No. 1501/QD-UB issued by the People's Committee of Ho Chi Minh City. During this period, we launched our first product-a Block Ice Making System-which served the emerging seafood processing industry of the 1970s.

Refrigeration systems and freezing technology have been the cornerstone of Arico's development. For over 40 years, we have proudly played a pivotal role, contributing to the growth and advancement of Vietnam's food and seafood industry.

Our company milestone

2020's	2025	<i>Become a subsidiary of Hoshizaki Corporation, specializing in the manufacturing of commercial food and beverage equipment as well as Industrial Refrigeration solutions for food preservation and cold storage.</i>
	2023	<i>Implementing full Freezer package for RTE products capacity up to 7 tons/hour D&B the Ammonia Refrigeration System & insulation facility for High Bay ASRS Cold Storage (-25°C; 55,730 pallets; 38.5mH)</i>
	2021	<i>Launching DirectDrive™ Double Tower Spiral Freezer (minus 43°C for RTE-breaded & frying product). D&B the Ammonia Refrigeration System & insulation facility for High Bay ASRS Cold Storage (-25°C; 40,000 pallets; 31mH)</i>
	2020	<i>Launching all new 3rd generation Steam Cooking/ Blanching</i>
2010's	2019	<i>Launching all new 3rd generation Fluidized IQF D&B cold storage for Tuna fishing port in South Pacific (Solomon Islands)</i>
	2018	<i>Invested the fully automatic line to produce the green material for construction. Building the first local automated cold storage with internal height up to 22 meters</i>
	2016	<i>Upgrade the new technologies for M&E factory and PU factory</i>
	2014	<i>Expand market to out of ASEAN. Exported the first Freezer Line to India market</i>
	2010	<i>Arico operated the new facility 25,000 sqm in Tan Tao industrial zone, Binh Tan District, HCMC.</i>
2000's	2009	<i>Searefico was listed on HOSE</i>
	2008	<i>Arico was established and inherited all activities of Searefico's Industrial Refrigeration Division (2007 October 22nd)</i>
	2006	<i>The first company in Vietnam successfully manufactured stainless steel Flake Ice Maker</i>

	2004	<i>The first company in Vietnam successfully manufactured Impingement Flat Steel Belt IQF for fish fillet</i>
	2003	<i>Export IQF and Air Blast Freezer to ASEAN Market (Malaysia, Indonesia)</i>
	2002	<i>Launching the first fluidized IQF for Pineapple and fruit products</i>
	2001	<i>The first company in Vietnam successfully researched and applied Impingement effect to IQF Invested the semi-automatic European modern technology PU Panel production line</i>
	2000	<i>The first company in Vietnam successfully manufactured Spiral IQF</i>
1990's	1999	<i>Searefico was privatized The first company in Vietnam successfully manufactured IQF (Individual Quick Freezer)</i>
	1993	<i>The first company in Vietnam successfully manufactured Air Blast Freezer and Tunnel Freezer</i>
	1991	<i>Export PU Panels to Russian Market</i>
	1990	<i>The first company in Vietnam successfully manufactured Contact Freezer</i>
1980's	1988	<i>The first company in Vietnam successfully manufactured PU Panel</i>
1970's	1977	<i>Mechanical workshop Phu Lam, the former of Searefico and Arico, was established</i>

Phu Lam Mechanical Workshop

On November 18th, 1977, Phu Lam Mechanical Factory was established by Decision No. 1501/QĐ-UB of People's Committee of Ho Chi Minh City.

In early 1978, Phu Lam Mechanical Workshop successfully researched and developed the Block Ice Making System. This was the foundation on which our knowledge and experiences in the Refrigeration Industry and Food and Seafood Industry machinery were formed and built up.

In late 1988, Phu Lam Mechanical Workshop proudly announced that it was the first company in Vietnam who successfully manufactured PU Panel. This milestone helped local food and seafood processors and exporters increase the rate of localization of their insulated structures, reduce the investment costs and taxes. Arico became the leading company in supplying PU Panel in the domestic market. In 1991, the Company marked another significant milestone when it became qualified firm which exported PU panel to Russian market.

In the middle of 1990, Phu Lam Mechanical Workshop contributed a very important milestone to Vietnamese Food and Seafood processing industry by launching the first Contact Freezer made in Vietnam in Mekong Delta region. We proudly became the leading

company in this industry. This milestone marked Arico's first legacy in Food and Seafood Industry Freezer machinery.

Searefico

On April 1st, 1993, Seaprodux Refrigeration Industry Corporation (Searefico) was established by Decision No. 95/TS/QDTC, as a State-owned enterprise directly belonged to Vietnam Sea products Import and Export Joint Stock Corporation. Searefico was engaged in the Engineering and Construction Industry.

Right after the establishment, Searefico merged with Phu Lam Mechanical Workshop, who was the leading firm in freezing and processing technologies in Mekong Delta. Under the Industrial Refrigeration business, it provided consultancy, design, manufacturing, and engineering for industrial refrigeration system used in food and seafood, beverage, and pharmaceutical industry.

Also in this year, Searefico with the foundation inherited from Phu Lam Mechanical Workshop, successfully manufactured first Vietnam-made-Air Blast Freezer and Tunnel Freezer which properly met increasing demand of Vietnamese seafood processing industry during the shifting era from exporting block, raw seafood to individual frozen, high-quality seafood. Thanks to the high localization-rate of these products, Vietnamese food and seafood processors and exporters not only increased their competitiveness by reducing the dependence on expensive machines from Europe and US, but also partially formed a foundation for Vietnamese seafood industry booming during next decades.

Three years later, in November 1996, Searefico merged Sea Refrigeration Electrical Engineer (Searee), who was the leading company in refrigeration system and freezing technologies in Middle of Vietnam, thus solidifying its position as the leading provider of Food and Seafood technology. This event marked a notable milestone, Searefico became the top-leading company in its industry in the country.

In 1999, as its quick growth, Searefico was privatized. This event gave a great chance for Searefico to not only reinforce its leading position in Food and Seafood processing machinery industry but also explore its ability and capability of serving in other industries such as F&B, M&E service, and Industrial and Commercial Machinery.

In 2009, Searefico was listed on HoSE and became a public company which is evaluated as the leading organization in its industry.

Today, Searefico joins in top 500 biggest companies in Vietnam and the group is ranked as the second M&E Service Supplier in the country.

ARICO

The former of Arico was the Industrial Refrigeration Division (IRD) of Searefico. This division played an important role during the development of Searefico.

By inheriting the foundation from Phu Lam Mechanical Workshop, IRD remarkably contributed its values to the significant development of Vietnamese seafood processing and exporting industry.

Arico – view from the air

In 1999, Arico first introduced Vietnam-made-Mesh Belt Individual Quick Freezer to Vietnamese market. This event marked a very important milestone in the Vietnamese seafood processing Industry. Instead of importing expensive IQF from Europe, US and Japan, Vietnamese seafood processing firms had a wonderful option to reduce the investment cost, thus helping to enhance their competitiveness.

As increasing clients' trust, Arico developed a series of freezers to adapt to an increasing demands of seafood products to be processed and exported from the Vietnamese Seafood players. Most of the remarkable milestones of Arico were archived during 2000s which is considered as the booming era of Vietnamese Food and Seafood industry.

In 2000, Arico became the first domestic company successfully manufactured the Spiral Individual Quick Freezer.

In 2001, Arico was the pioneer firm who invested in an automatic European modern technology PU Panel production line.

In late 2001, Arico became the first Vietnamese company successfully applied impingement effect on IQF for shrimp and small size products; at the same time, we successfully manufactured Fluidize IQF for fruit and vegetable foods.

In 2003, Arico exported its IQF and Air Blast Freezer to the ASEAN market. This event marked a great milestone that Arico was the first Vietnamese machinery supplier expanded its business out of Vietnam and gained the trust from the client

In 2004, Arico became the first Vietnamese company successfully manufactured Impingement Steel Belt IQF for fillet fish and packaged foods.

In 2006, Arico became the first Vietnamese company successfully manufactured 30 Tons Stainless Steel Orbital Ice Storage.

During the decade 2000s, with a strong technical foundation and professional R&D activities, Arico were always the first company who brought new machines and technologies to Vietnamese Food and Seafood Industry.

In 2007 October 22nd, Arico was established and inherited all activities of Searefico's Industrial Refrigeration Division.

In 2010, Arico operated the new facility 25,000 sqm in Tan Tao industrial zone, Binh Tan District, HCMC.

Not limiting within Vietnamese and ASEAN market, in 2014, Arico brought its value to other markets, such as Indian. Our commitment is to be always in favour of your development by continuously researching, applying and upgrading new technology, not only in design but also in manufacturing, and bringing more value to our clients.

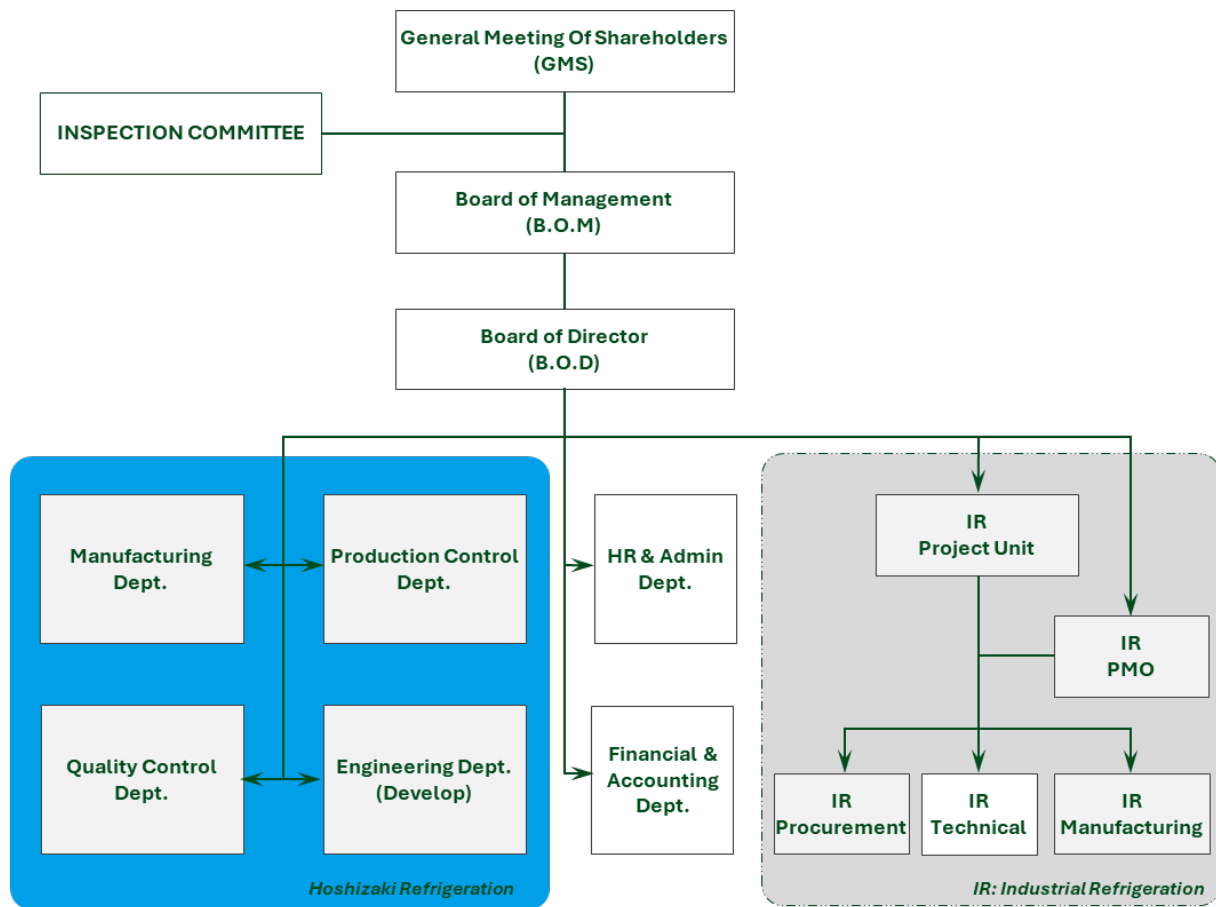

HOSHIZAKY Group Company

The Journey of Made in Vietnam – Japanese Technology

In March 2025, Hoshizaki, a Global leading Manufacturer of commercial equipment for food and beverage services, has strategically acquired a 51% share in Arico, a prominent Vietnamese company specializing in industrial refrigeration and freezing technology for the food and seafood industries. This majority stake not only solidifies Hoshizaki's position in Southeast Asia but also enables the company to leverage Arico's extensive expertise and innovative solutions to drive business expansion in the region. Together, the two companies aim to deliver enhanced value to clients by combining advanced technology with a shared commitment to excellence, paving the way for sustainable growth and innovation in the global market.

A new journey has started.

ORGANIZATION CHART

VISION AND MISSION

Our VISION

To be the trusted partner in providing high-quality products and innovative refrigeration solutions, driving sustainable growth across the food services, F&B, and cold chain industries.

Guided by our motto, **'Always in favour of your development'** we drive efficiency and strengthen partnerships.

Our MISSION

Our focus is on researching, innovating, and developing cutting-edge solutions specifically designed for our clients across the industries we serve.

We are dedicated to delivering exceptional quality to our partners while cultivating an advanced, supportive work environment and promoting a healthy, fulfilling life within the community we are proud to be part of. Together, we strive to build a friendly, prosperous, and happy community.

Our VALUES

Agility, Reliability, continuously Innovative technology, Conformity and one Team spirit are the set of guiding principles and fundamental beliefs that help us work towards to provide products and services for Our Clients.

AGILITY • RELIABILITY • INNOVATION • CONFORMITY • ONE TEAM

We have 5 core values that are our northern start guiding us to success:

AGILITY

- Encourage Customer-First culture and we strive to react faster to changing situations.
- Focus on **value creation**, working on agile approaches to improve collaboration.
- We value **Agility** in our decision-making, in our planning and in our delivery.

RELIABILITY

- We always prioritize state-of-the-art technology and the highest quality standards.
- We are committed to finding solutions, maintaining honesty, and ensuring **reliability** in everything we do.
- **Trust** is at the core of our reliability, shaping the dependable services we offer.

INNOVATION

- We strive to be successful and aim to **learn and grow** every day.
- Creating environmentally friendly innovative ideas and solutions is our passion.
- Efficiency and Going Green are what our **Innovation** offers.

CONFORMITY

- We follow and create standards in the industry we serve.
- Our solutions are designed to meet the needs of both our clients and their business partners in B2B relationships.
- **Internalization** and **Compliance** are what our **Conformity** offers.

ONE TEAM

- At Arico, we recognize and value the uniqueness of every individual, believing in the immense power of collaboration and **teamwork**.
- We respect everyone's contribution, we work together, across organization and cultural boundaries, to find solutions and succeed as a Team.
- As **One Team**, we are dedicated to supporting each other's well-being and collective success.

OWNERSHIP AND FINANCE

- ✓ ARICO is the Joint-stock Company
- ✓ Registered capital : 278,311,200,000 VND
- ✓ Business Number : 0305429178
- ✓ D-U-N-S® Number : 555352666

III. PRODUCTS AND INFRASTRUCTURES

TYPICAL PRODUCTS AND SERVICES

We offer our clients a diverse range of products and services, from complete turn-key projects to customized individual equipment solutions.

Our expertise includes designing and constructing food processing plants, encompassing refrigeration systems, processing lines, freezing equipment, cold storage, and SCADA/FMS systems. Our product portfolio consists of:

- IQFs (Individual quick freezer) and Re-freezer
- Air Blast Freezer
- Contact Freezer
- Flake Ice Machine & Ice storage system
- Cold storage, building insulation, insulated panels and doors
- Steam Cooking machine, Blanching machine
- Food Processing Line, Sub-equipment
- Stainless Steel Condenser
- Pressure Vessels
- Refrigeration system
- Air Conditioning, Ventilation, Plumbing System
- Power Supply and Distribution, Electrical Control Panel c/w PLC
- Supervisory Control and Data Acquisition (SCADA) / Factory Management System (FMS)

As a one-stop solution provider, we are committed to delivering high-quality, cost-effective engineering designs, services, and products to help enhance your capacity. By following a structured collaboration process, we ensure our work is completed on time and within budget.

INFRASTRUCTURES

Arico own a factories and office complex built on a spacious area of over 25,000 square meters in Ho Chi Minh City, the biggest city in Vietnam.

Our Mechanical & Electrical factory, equipped with modern automated machinery and a skilled team with expertise in food processing, delivers superior products that meet the strict standards of the food industry.

With advanced cutting and bending machinery like Fiber Laser Cutting and CNC Bending, ARICO's engineers use modern design methods such as CAD and 3D modeling. This allows us to continuously improve our products and solutions for food processing clients.

Ready to Ship Zone

SUPPLY & ERECTION REFRIGERATION SYSTEM, FOOD FACTORY, WAREHOUSE

The extensive experience gained from major projects across Vietnam, India, Cambodia, and beyond has transformed our Project Managers and Site Coordinators into experts in tackling challenges related to project management, construction sites, subcontractor oversight, HSE, quality assurance, and quality control.

We follow:

- ✓ PMBOK: Project Management Body of Knowledge
- ✓ HSE (Health, Safety & Environment) program

This ensures efficient, practical, and cost-effective processes tailored to each project's specifications. Our commitment is to deliver nothing less than the best services to our clients.

IV. NOTABLE CLIENTS

We have many frequent local Clients as well as international Clients for many different fields of business, especially in Food Industry.

Some of our Notable Clients are:

V. OUR PARTNERS, FAITHFUL SUPPLIERS

We have good long-term relationship with many suppliers from all over the world.

Many of them are our OEM partners and play an important role in our supply chain.

Some of our Notable Faithful Suppliers are:

VI. APPENDIX – NOTABLE PROJECT FROM 2009

No.	LOCATION	PROJECT	SERVICE	YEAR
153	HUE	CARLSBERG	Supply and install a full-package of upgrading refrigeration equipment system for the capacity expansion project of Hue Caslberg brewery.	2023
152	BAC NINH	TIEN SON MILK	Supply and install a full-package of upgrading the central cold water system for the capacity expansion project of Tien Son milk factory.	2023
151	DONG THAP	SAPO DONG THAP	Supply and install a full-package of refrigeration equipment system for Sapo Dong Thap factory, including: - Full-line Fluidized IQF 2000 kg/hour; - Cold storage, antee room, import buffer room and loading dock system; - NH3 central refrigeration system.	2023
150	CAMPUDIA	ANGKOR MILK	Supply and install a full-package of upgrading the central cold water system for the capacity expansion project of Angkor milk factory.	2023
149	INDIA	AVANTI	Design, supply and install 02 full-line IQF capacity 1,000kg/hr for seafood factory.	2023
148	CA MAU	CAMIMEX	Supply and install a full package of conveyor system for the processing plant, including: - Downgo Spiral conveyor system, - Processing conveyor system includes 4 feeding conveyors, 14 processing conveyors, 5 waste collecting conveyors.	2023

No.	LOCATION	PROJECT	SERVICE	YEAR
147	LONG AN	LAI	Design, supply and install a full package of automatic cold storage system (ASRS) with capacity 55,730 pallet.	2023
146	BINH DUONG	LC FOOD	Design, supply and install a full package of RTE food manufactory capacity 220 tons/day; Including : 2 fluidized IQF 3,200kg/h; Steelbelt IQD 500kg/h; 2 flake ice maker 15 tons/day; cold storage 3,600 pallets; central refrigeration system; SCADA.	2022
145	HAU GIANG	MINH PHU HAU GIANG	Supply, install a full package of cold storage system, corridors, insulated doors, import and export corridors, ceiling and wall panels for the entire food processing manufactory.	2021
144	BAC LIEU	VIET UC	Design, Supply and install a full package of refrigeration system for Viet Uc seafood processing manufactory, including: Cold storage enclosures, buffer corridors, export corridors, export equipment, 04 flake ice machines, refrigeration systems and SCADA refrigeration system.	2021
143	DA NANG	VINATRANS	Design, supply and installing full-packed of refrigeration system 15,000 pallet for the factory.	2021
142	CA MAU	MINH PHU KHANH AN	Supplying, installing, full-packed refrigeration equipment and cold storage refrigeration system for Khanh An seafood processing manufactory.	2021

No.	LOCATION	PROJECT	SERVICE	YEAR
141	SOC TRANG	HAI TRI	Design, Supply, Install a full package of refrigeration equipment system for Hai Tri manufactory. Including: Mobile racking 2,940 pallet, 02 full-line IQF capacity 500kg/h, 02 air blast freezer, 02 contact freezer, 02 flake ice machine, capacity 20T/day, cold water processing, air conditioning system, the central refrigeration system NH3, SCADA system.	2021
140	BINH DUONG	ACC AN LOC	Supply and install a full package of cold storage; Pharmaceutical warehouse; pharmacy office; Dry storage; Lot of dry and cool warehouse doors; Acessories included for cooling; Factory ventilation louvers and other ancillary items.	2021
139	BINH DUONG	ACC AN LOC	Supplying and installing full-packed for cold storage; Pharmaceutical warehouse; Pharmacy office; Dry warehouse; Door lot for cool and dry storage; Attached accesories for cooling; Factory ventilation louvers and other additional items.	2021
138	HO CHI MINH	TON PHUC NHIEU	Supplying and installing full-packed cold storage refrigeration system for the factory.	2021
137	INDIA	ECS	Supply full Line Cooking & IQF for shrimp, includes: <ul style="list-style-type: none"> - Multi-stage steam cooker 750 kg/h - Rainfall cooler 750 kg/h - Infeed conveyor 750 kg/h - Uni-Impingement mesh belt IQF with capacity 750 kg/h - Double-Dip glazer 900 kg/h - Hardening conveyor 900 kg/h - Uni-Impingement re-freezer 900 kg/h - Production collecting conveyor 	2020

No.	LOCATION	PROJECT	SERVICE	YEAR
136	BINH DUONG	THIEN NAM	Designing, supplying and erecting full-packaged refrigeration system for Dong An Distribution Center, including: - 5500 m2 PIR insulated panel for cold storages; and partitions, ceiling of production warehouse. - Loading equipment for cold room - Multi-PAC freon refrigeration system & Ventilation system.	2020
135	LONG AN	DELTECH	Supplying, erecting 9600 m2 insulated panels for factory external walls & internal partitions.	2020
134	BEN TRE	GO BEN TRE CBM	Supplying and installing full-packaged refrigeration system including: - Insulated panel for whole cold storage, chill room for supermarket. - Freon refrigeration system - Electrical power & piping line for showcase.	2020
133	HCMC	SAIGON FOOD	Supplying and installing full-packaged refrigeration equipment system for upgrading the factory no.1 and no.4.	2020
132	HAI PHONG	DKP (Phase 1)	Supplying and installing full-packaged freon refrigeration system, insulated panel, doors for the 1200 MT cold storage.	2020
131	DONG THAP	SANG NGOC	Supplying, installing refrigeration equipment system, cold storage & refrigeration system for fish processing manufactory: - Insulated panel for cold storage capacity 100MT	2020

No.	LOCATION	PROJECT	SERVICE	YEAR
			<ul style="list-style-type: none"> - 03 sets of hinged doors size 1200W * 2000H - 02 Tunnel freezer with capacity 500 kg/batch. - Central refrigeration system. 	
130	SOC TRANG	THAI HOA	Supplying and installing refrigeration equipment system for Thai Hoa Foodtech processing manufactory: <ul style="list-style-type: none"> - 02 Conveyors for Sushi processing - 04 conveyors for Nobashi & breaded shrimp processing - 10 breaded shrimp frying machines - 02 cooling conveyor - 01 system of supplying and recovering oil after frying 	2020
129	DONG NAI	KIRIN	Supplying and installing full-packaged refrigeration for Chocolate Processing factory: <ul style="list-style-type: none"> - refrigeration system with 5 units, combine with electrical system & all piping line; - PHE for brine cooler system minus 23°C. 	2020
128	BAC LIEU	F69 SEA MH	Supplying and installing 500 MT cold storage	2020
127	CA MAU	TOM MIEN NAM	Supplying, installing cold stage for Tom Mien Nam aquatic product Processing factory (2 nd factory): <ul style="list-style-type: none"> - Cold storage with 600T connected with new refrigeration system; - 01 Uni-Impingement Mesh Belt IQF 1500 kg/h; - 01 refreezing system 1800 kg/h; - Infeed conveyor system 1500kg/h; - Flake ice system 30 tons/day; - NH3 refrigeration system. 	2019

No.	LOCATION	PROJECT	SERVICE	YEAR
126	SOLOMON	SOLTUNA	<p>Supplying and installing cold storage and office complex project.</p> <ul style="list-style-type: none"> - Cold Storage with 4,000 bins, corridor, loading door system; - NH3 central refrigeration & control system, automatic monitoring; - Pre-engineered steel buildings and construction for cold storage 4,000 bins, office departments and functional rooms for monitoring cold storage. 	2019
125	SOC TRANG	THAI HOA	<p>Supplying and installing refrigeration system for Thai Hoa Foodtech manufactory.</p> <ul style="list-style-type: none"> - 02 Full-line IQF, each line capacity 1,000kg/h including infeed conveyor system. - 02 Full-line IQF tempura each line capacity 500 kg/h. - Steam cooker system capacity 1,000 kg/h. - 05 Flake ice machine, capacity 15T/day x 5. - Cold storage with capacity 912 pallets. - NH3 Refrigeration system 	2019
124	TP HCM	BÁCH HOÁ XANH	<p>Designing, supplying and installing Tran Dai Nghia product distribution center</p>	2019
123	SOC TRANG	STAPIMEX	<p>Supplying, Installing IQFs series POW Freezer SFW180135-2AF-11F 600 kg/h for breaded fried shrimp with dual belts and central control system.</p>	2019
122	KHANH HOA	MARISO	<p>Supplying, installing conveyor system for tuna steamed processing with 250 manipulation positions.</p>	2019
